

§ 15A-1369.5. Change in medical status.

(a) If a periodic medical assessment reveals that an inmate released on medical release has improved so that the inmate would not be eligible for medical release if being considered at that time, the Commission shall order the inmate returned to the custody of the Division to await a revocation hearing. In determining whether to revoke medical release, the Commission shall consider the most recent medical assessment of the inmate and a risk assessment of the inmate conducted pursuant to G.S. 15A-1369.3(b)(2). If the Commission revokes the inmate's medical release, the inmate shall resume serving the balance of the sentence with credit given for the duration of the medical release.

(b) Revocation of an inmate's medical release due to a change in the inmate's medical condition shall not preclude an inmate's eligibility for medical release in the future or for any other form of parole or release provided by law. (2008-2, s. 1; 2011-145, s. 19.1(h).)
